

You are a **post-graduate or a PhD student from a European country (except France)**, you are interested in aquatic ecology and you want to train yourself in conducting mesocosm experiments, this announcement is for you! Please join us in June and July 2021, apply for the trainee Aquacosc Plus program (<https://www.aquacosm.eu/>; dead line April 26th).

You will be staying at the CEREEP – Ecotron IledeFrance (<https://www.cereep.bio.ens.psl.eu/>), a beautiful site 1h train from the center of Paris, 20 min from the famous Fontainebleau Castle and its hiking and bouldering forest. You will learn how to conduct a mesocosm experiment and to measure some key parameters in aquatic ecology with other students and an experimented team of researchers. Aquacosc Plus supports travel and accommodation expenses.

Aquacosc Plus reference: Transnational access, CNRS-CEREEP, 9.15 (2), Restore Project
