

SEFS 13

SYMPOSIUM FOR EUROPEAN
FRESHWATER SCIENCES

The Freshwater Biological Association is delighted to announce that the 13th Symposium for European Freshwater Sciences (SEFS13) will run as a live (in-person) conference from 18 – 23 June 2023. Following the amazing offerings of SEFS12 which was in an online-only format due to COVID-19, this is the first time in four years that the freshwater community will have the opportunity to meet in-person at a SEFS conference, and we can't wait to welcome you to Newcastle, in the UK.

We will deliver an exciting programme of plenary talks alongside parallel, special and poster sessions. Much-anticipated mid-conference excursions will showcase the best of north east England's environment, culture and heritage. There will also be extensive opportunities for networking and socialising between sessions and at the conference gala dinner, which will take place in St James' Park (the home of Newcastle United). Training and workshop opportunities tailored towards early career colleagues will be organised by the early career (EFYR) group of the European Federation of Freshwater Sciences and the FBA's Early Career Network.

Registration is now open [here](#) with early-bird prices available. We look forward to welcoming you to SEFS13 with the opening ceremony on 18th June 2023.

Call for Special Sessions opens today!

If you are interested in hosting a special session at SEFS13 then download the Special Session form from [here](#) and return to sefs13@abbeyuk.com before the 21st October 2022.
